

May 29, 2020

Dear Members,

In the last few days, there have been a number of new developments at the Club but before we get into those items, I want to thank *each and every member* for their patience as the Club reopens under these unique circumstances.

A few friendly reminders:

Everyone must wear a mask anywhere on PYC property.

The side gate is *only* to be used to gain access to the launch or your boat.

As always, use of PYC property is at your own risk.

Be A Responsible Boater and help keep everyone safe.

Please pass along the news that PYC is selling fuel! The fuel flag will fly once the pole is installed on the new pier. This development has been announced on the website and by calling our local businesses who rely on us for fuel.

The Kittery Harbormaster has issued further guidance which you can access [here](#).

Meet PYC's 2020 staff on our website. [Visit PYC/Staff](#)

Facility Updates:

The water heater has been replaced after valiant attempts to get it to go 'just one more year'.

The new kitchen stove and island have been delivered but are not yet installed.

The internet, security cameras, and webcam are all online. Many thanks to P/C Dan Gingras who continues to take care of this part of our operations!

My very best to each of you,

Pat Dowey
Commodore
