

Hi Pat,

This correspondence is a follow up to our telephone conversation regarding the complaint letter.

As I stated in that conversation, the letter contains misinformation as to the events on August 7th. I admit to borrowing a spatula from the kitchen but it was only as a last resort to save the burgers on a grill. I had forgotten that the club is not providing grilling utensils. I did not open the plastic barrier as the letter states. It was already open and I thought maybe someone was working in there so I ran in and out hastily (while wearing a mask). I washed, disinfected, and returned the spatula promptly.

Also, there were no cones where I parked in the lot. I have three witnesses who will attest to that fact. The fuel delivery driver approached me while I was eating and asked if it was my vehicle. I said I could move it but asked if he wouldn't mind doing it as the keys were in it. The driver was very nice and said that he would. I really didn't think that this was a problem.

I have been a member for 39 years, served the club in many capacities, and would never intentionally do anything to upset the club's operations. I hope I have addressed the board's concerns with this letter.

Sincerely,
Bill Rushforth
